FRIDAY, OCTOBER 20, 1916

Wall Street and Special Interests are solidly for Hughes. 'Nuff sed.

For the next week or two Ohio is to be bombarded by the heavy oratorical guns of both parties.

Former Gov. Cox is putting up a great fight to defeat Gov. Willis and his friends believe he will succeed.

In the event of the election of Mr. Hughes to the presidency it seems to be agreed that Roosevelt will be made Secretary of State in consideration of valuable political services rendered.

"Our real eminence lies in the victories of peace rather than the victories of war," President McKinley's last address. Let us stand by President Wilson who has kept us out of war.

Senator Allen Pomeroy made a splendid impression in Portage county last week, and should have the hearty support of all who desire to be represented by brains developed by education, the practice of honesty and sincere desire to perform acts for the benefit of the whole people rather than by brains backed up by boudle, the practice of acquiring money and desire for political and social honors. Pomeroy acquired his prominence solely by the former method. Herick never accomplished anything without the lavish expenditure of money. Herick spent \$50,000 to secure his nomination for the United States Senate, and if elected money and money only will shine at Washington. Do the people of Ohio want to surrender to a boudle? A vote for Herick will indicate that no man without a barrel, and a big barrel at that, can expect to run for office in Ohio.—Ravenna Democrat.

WERE JUDGE HUGHES TO WIN

The election of Judge Hughes to the presidency of the United States next month would be a message to the world that the citizens of this powerful and prosperous nation had repudiated the leadership of its chief executive at a period when tried, sane leadership is needed more than at any other time since the civil war. It would, however, bring gratification in certain very definite circles.

A triumph for Hughes would be welcomed at the capital of the German empire as a victory no less important than a great triumph of arms on one of the battle fronts. It would testify to the German bureaucrats that all the pledges forced from them by the splendid diplomacy of Woodrow Wilson need no longer be observed. It would be taken to indicate that German opinion in America was stronger than American opinion; that American politics could be directed from a foreign capital through the agency of disloyalists in the United States.

A triumph for Hughes would be hailed with delight by every interest bent on exploiting Mexico for its own profit. It would be deemed tantamount to a declaration that the iron heel of the United States would be set on the neck of suffering Mexico; that the rights of Mexicans to liberty and the pursuit of their own voluntary destiny would no longer be respected by their powerful neighbor on the north. It would be a signal to Pan Americans everywhere that the United States pledges of the past could no longer be trusted.

A triumph for Hughes would be the best news Wall Street had heard in years. It would put in jeopardy the federal reserve banking act which deprives the money interest of their long standing privilege of manipulating the credits of the nation to their own profit and to the nation's periodic distress.

A triumph for Hughes would be like a rainbow of hope to the citadel of ultra high finance. It would throw the tariff issue back into the maw of party politics and neutralize all the progress made since the enactment of the repudiated Payne-Aldrich law. It would be a black eye to the idea of commission investigation and to the higher protected interests of dictating to congress the kind of tariff that should be enacted on their behalf.

A triumph for Hughes would bring joy to every subsidist heart in the nation. It would herald the end of the policy of interest which believes it more profitable to live by favor than by honest, intelligent effort. It would mean a ship subsidy in place of the present shipping bill—or no shipping measure at all.

A triumph for Hughes would mean profit and gladness to the barons of the armor plate trust which for so many years capitalized the helplessness of the government and has now for the first time been successfully challenged and by the administration Judge Hughes would displace.

A triumph for Hughes would mean a repudiation of the Wilson-Brandeis idea that labor is something more than a mere commodity to be bought and sold like carpet tacks or shoe leather. It would be a triumph for those who believe that the Democratic congress was wrong in lifting this ancient stigma from American labor.

A triumph for Hughes would be a triumph for reaction for stand-pat; a triumph for the Smoot-Penrose idea in American political life as opposed to the Wilson-Brandeis idea. It would be a signal that Americans had wearied of progress and were ready to surrender to the forces of stand-stillism.

These elements which are hostile to the best American traditions and hopes must not be gratified by a triumph for Hughes. The line-up is definite. The result could not be misinterpreted.—Plain Dealer.

WHY HUGHES?

The case against President Wilson is all before the Jury of American voters.

Everything that can be said against the Wilson Administration has been said. Every attack that can be made on the Wilson policies has been made. Not an issue can be used that has not been raised. For all practical purposes the record is complete. Yet President Wilson is stronger today than at any other time since the campaign began, and his strength is increasing with amazing rapidity.

The Republicans have no hope of victory except through the corrupt power of money in politics, except through the brute force of political organization and except through the appeal to German prejudice against the President.

Week after week and month after month Mr. Hughes and his supporters have been presenting their reasons why President Wilson should be defeated. With the election little more than three weeks away, they have been unable to present any reasons why Mr. Hughes should be elected. They began the campaign without a legitimate issue and they are closing it without a legitimate issue. At best they can only assail the President and ask the American people to take a leap in the dark.

Mr. Hughes and his managers believed that he could pussyfoot into the Presidency without revealing his policies and purposes. They still believe it. Every Hughes speech is a mere repetition of previous Hughes speeches, with their elastic generalities and their pretentious platitudes. There is not an issue of the campaign on which Mr. Hughes has taken a position, positive, stand except the Susan B. Anthony amendment to the United States Constitution. In respect to everything else he is vague and intangible.

When a candidate will not speak for himself he must be judged by the company he keeps, and no other candidate for President ever trained with such a motley crew as that which follows Mr. Hughes. No Administration could survive that was forced to depend upon reconciling such unrecognizable elements. Yet the support of all of them, from Wall Street to the German-American Alliance, from Penrose to William Allen White, would be necessary to Mr. Hughes if he were chosen to conduct the affairs of the United States government.

In ordinary times a nation may occasionally risk experiments and trust to fortune, but these are not ordinary times. If the American people have a right to know anything about their public affairs, they have a right to know precisely what a candidate for President represents, precisely what his policies are, precisely what his programme of government is, and precisely what he intends to do. They have no information whatever of this kind from Mr. Hughes, and they can obtain no information. All efforts have failed. Mr. Hughes is deaf and dumb to all appeals.

The peace of the country today rests wholly in the hands of the President of the United States. A single mistake, a single blunder, a single advised action, and he can plunge 100,000,000 people into the midst of the most devastating war that mankind has ever known. There are no ascription limits to the calamities in which a tactless, an obstinate or an ill-informed President can involve the nation.

To elect Mr. Hughes is to elect an enigma, a conundrum, a puzzle, a conjecture. So far as knowledge of his policies and purposes are concerned, the voters might as well blindfold themselves and make a President out of the first man they happen to slap on the back in a street crowd. They would be taking essentially the same chances that they are taking with Mr. Hughes.

Mr. Hughes might make a good President after he had two or three years' experience in the office; but to train him now is like putting a green engineer in charge of the Twentieth Century Limited. The green engineer might not wreck the train, but that would be good luck, not good management.

The more the American people study the situation that confronts them the swifter the tide must run toward President Wilson. When they re-elect him, they are not gambling with destiny. They know where he stands on every question of the campaign. They know his record. They know that his Administration will move steadily ahead. They know that he represents American idealism in its truest form. They know that he has kept the faith and that he is one of the greatest leaders that American democracy has raised up to the glory of the Republic.

Why Hughes? Nobody has answered that question and nobody can answer it except by appealing to passion, prejudice and partisanship.—N. Y. World.

DEMOCRATIC CATALOG OF WILSON'S ENEMIES

Written for the Democratic National Committee by George Creel.

Never was anyone so fortunate in his enemies as President Wilson.

The forces that fight him emphasize his achievements and accentuate the issues more strongly than all the words that could be used. Against him is Wall Street, eager to repudiate the Federal reserve act that has released credit and forbidden usury; the employers who made money out of child labor; the shipping trust, still dreaming of subsidies and furious against the Seamen's law that has lifted the sailor out of slavery.

Financial imperialism, hopeful of the time when it may use the army and the navy as collection agencies; the armor plate trust and the Powder trust, whipped out of their extortions by government manufacture; the tariff swine, some of which for the Payne-Aldrich law upon which they built their monopolies; the labor crushers who have the provision in the Clayton law that stopped the abuse of the writ of injunction and the imprisonment of men without trial by jury; the reactionaries who fought the appointment of Brandeis to the supreme bench because they feared his honesty and progressivism.

The alien conspirators, impudently demanding that a president be elected who will take his foreign policies from Berlin or London; Shylocks resentful of the Rural Credits law, and all the host of grafters who have been divorced from the good old trough at which they fed for so long a time.

Not a monopoly, not a concessionaire, not a "hyphen," not a Tory nor a reactionary is missing from the roll of Woodrow Wilson's enemies. All of them are for Hughes, pouring their millions into his campaign fund, and supporting him with mad enthusiasm in those newspapers and magazines

that they own, and in that position of the foreign language press that they have subsidized.

Never was choice so plain. On one side a President, who has fought for the people and for America; on the other side every sinister force that has been poisoning the wells of democracy; every corrupt influence that has been taking the teeth out of the Declaration of independence.

GREENFORD

Oct. 19—Greenford grange broke its record last Saturday afternoon and evening when over 600 people attended its fair held in grange hall.
